linkedin.com/in/arpitrai | github.com/arpitrai11 | portfolio-ten-chi-hxfafi3hvs.vercel.app

PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience building scalable web applications using React, JavaScript, and Node.js/Express.js. Skilled in designing REST APIs, working across relational and NoSQL databases (PostgreSQL, MySQL, MongoDB), and deploying containerized services with Docker. Experienced with AWS S3, Git-based workflows, and writing clean, well-documented code. Strong problem-solver with a track record of delivering full-stack features end-to-end in agile environments.

KEY SKILLS

Programming Languages: JavaScript, TypeScript (Basic), Python (Basic)
Frontend: React, Next.js (Learning), HTML, CSS, Tailwind CSS, Shadcn UI
Backend: Node.js, Express.js, REST APIs, JWT Authentication, API Integration
Databases: PostgreSQL, MySQL, MongoDB
Cloud & DevOps: AWS S3, Docker, Vercel
Tools: Git, GitHub, Swagger/OpenAPI, Postman
AI & Automation: n8n (Workflow Automation), LLM API Integration (Gemini), Prompt Engineering, AI Agent Workflows, Human-in-the-Loop Approval Flows, Telegram Bot API, Webhooks
Concepts: Agile Methodology, OAuth/SSO (Basic Understanding), Scalable Web Application Design

PROJECTS

1. JAL-DRISHTI – AI-Driven Flood Prediction & Early Warning Platform
Tech Stack: Python, REST APIs, React, TypeScript | Code: github.com/arpitrai11

- Building a basin-scale flood intelligence and early-warning platform for Assam, India, combining historical flood events, ERA5-Land rainfall reanalysis, upstream rainfall, hydrological connectivity, and terrain data.
- Developed an explainable decision-support engine and REST API with a React dashboard featuring historical event replay (56 events, 2000–2018) and an interactive district-level intelligence map.
- Enforced data validation and readiness gates so missing data is never fabricated; wrote automated tests for graceful degradation and temporal integrity.

2. AI-Generated Social Media Posting
Tech Stack: n8n, Gemini API, Kie.ai, Zernio, Telegram Bot API, Docker | Code: github.com/arpitrai11

- Built an n8n automation workflow that uses AI to generate social media captions, hashtags, and images tailored to a company's business profile.
- Created a Telegram bot interface that collects company name, profile, and platform, then sends post previews with Approve / Edit / Decline controls for human review.
- Designed to publish to Facebook, Instagram, LinkedIn, and TikTok via Zernio; deployed locally with Docker and ngrok webhooks.

3. Chhattisgarh Taxi Service
Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS | Live: chhattisgarhtaxiservice.com

- Built a full-stack taxi booking platform with a React frontend and Node.js/Express.js backend.
- Developed REST APIs and a MongoDB schema to handle booking, driver, and trip data.
- Implemented user authentication and created responsive booking interfaces for mobile and desktop.
- Optimized application performance for faster load times and smoother interactions.

PROFESSIONAL EXPERIENCE

Full Stack Engineer (Trainee) | Logimetrix Tech Solutions Pvt Ltd 29 Jun 2026 – Present

- Design, build, and maintain company websites and web-based solutions for development needs.
- Handle end-to-end full-stack work, from implementing new features to ongoing maintenance and updates.

Front-End Developer Intern | Holiday Dost Jul 2025 – Sep 2025

- Developed and maintained dynamic, responsive UIs using modern JavaScript frameworks, improving rendering efficiency and page load performance.
- Debugged front-end issues and collaborated with the team using Git-based version control.

IT Systems Intern | South East Central Railway (SECR) Jun 2025 – Jul 2025

- Analyzed large-scale infrastructure and networked systems (UTS, PRS, Railnet), gaining exposure to high-availability, transaction-heavy system design.

EDUCATION

Bhilai Institute of Technology, Durg Graduation: 2026
B.Tech in Computer Science & Engineering — CGPA: 7.0/10

Class XII (CBSE) 2021
Aggregate Percentage: 92.4%
